RE: Motion Composites Latex Free Wheelchairs

Motion Composites have reviewed all raw material and components on our wheelchairs to identify if any material or ingredients used to produce our wheelchairs could contain latex or similar natural rubbers.

The material used to manufacture the Motion Composites wheelchairs, such as the frames, seat upholstery, back upholstery, pads, cushions, grips, wheels, armrests, footrests, legrests, headrests, etc., is latex free.

We also confirm that the material provided to pack and protect our wheelchairs during shipping is not formulated with or do not contain any latex natural rubber or any dry natural rubber.

If you have any question regarding the Motion Composites products, please feel free to call or email me at your convenience

A handwritten signature in black ink that reads "Stéphane Le Beau". The signature is written in a cursive style with a horizontal line underneath the name.
